

Pacific Campus Information Sheet

California Pacific Medical Center's plans for transferring services to the Cathedral Hill Campus include transforming the Pacific Campus into an Ambulatory Care Center, providing primary and secondary (specialist) care services.

Radiation oncology erased Joel's vocal cord cancer. The Institute for Health and Healing helped him write the next chapter of his life. The Institute for Health and Healing will be a key feature of the new Pacific Campus.

The new Pacific Campus :

- Major medical programs and services will be transferred to the Cathedral Hill Campus once it is built, allowing for further building renovations at the Pacific Campus.
- The main hospital building at Pacific Campus will be renovated to become the new Ambulatory Care Center (ACC), which will be enhanced with a new building (the ACC Addition).
- New underground parking will be constructed below the ACC Addition, and a new internal driveway will allow vehicle access from Sacramento Street, relieving Buchanan Street of any new traffic.
- A new parking garage will replace three older buildings on the Pacific Campus, and the current Clay/ Webster Parking Garage will be expanded to meet future parking requirements.
