CPMC

Proposed Hospital, St. Luke's Campus, view from Cesar Chavez

California Pacific Medical Center, which provides health care for more than 40% of San Francisco patients, plans to modernize our system of care while meeting state earthquake safety mandates. We plan to build two state-of-the-art acute care hospitals, one conveniently located at Van Ness and Geary and one at our St. Luke's Campus, and to complete a major renovation at our Davies Campus. Our citywide plan will double the number of earthquake-safe beds in San Francisco, improve privacy and infection control by creating all single-patient rooms, inject \$2.5 billion into the economy while creating 1,500 construction jobs, and improve health care access for all San Franciscans. This integrated system of care depends on each component working together to ensure that CPMC can continue to deliver the best care for this and future generations.

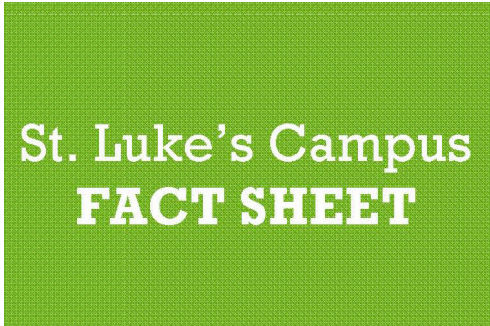

REVITALIZING OUR ST. LUKE'S CAMPUS

Revitalizing the St. Luke's Campus is one pillar of our plan to Rebuild CPMC. This 140-year-old campus has deep roots in the Mission District and a reputation for providing high-quality care to its diverse populations.

We propose to transform St. Luke's into the hospital of choice for the southern sector of San Francisco, ready to serve both its longstanding patient base and to attract physicians and patients from all nine of the campus' surrounding neighborhoods. Our vision for the future of this campus reflects input from a Blue Ribbon Panel of health care advocates and community leaders, from the San Francisco Health Commission as well as our physicians and staff. We are working with our St. Luke's neighbors on our construction plan.

Proposed patient room, St. Luke's Campus

OUR PLAN FOR A NEW ST. LUKE'S CAMPUS

- Eighty acute care beds to accommodate the current average of 50 patients as well as future growth
- Inpatient medical care, surgical care, critical care, labor and delivery, and post-partum care
- Single-patient rooms that will improve privacy and infection control
- A modern emergency department with 50% more space than the current one
- A hospital that can safely remain open to continue providing essential services after a major earthquake
- Future expansion plans include a new medical office building on the site of the old hospital

Proposed Hospital:

Building Height: 99 feet
Stories: 5
Patient capacity: 80 beds
Parking: 215 spaces
(existing garage)

Future Expansion Plan: Medical Office Building:

Building Height: 100 feet
Stories: 5
Parking: 220 spaces

IMPROVED CARE FOR ST. LUKE'S COMMUNITIES

- A family-oriented urgent care center
- Pediatric services, including a child development center for children with special needs and a clinic with the specific goal of improving health care for the children of the Bayview Hunters Point
- Chronic disease management through a model that uses community health workers to provide health education and individualized support
- Women's care, including a low-intervention birth program supported by physicians and midwives
- Senior care including orthopedic surgery, medical cardiology and a diabetes center
- Diagnostic services including laboratory, mammography, MRI and colonoscopy
- Plans to refurbish the Monteagle Medical Office Building with the goal of 100% occupancy and to open new physician practices throughout the surrounding neighborhoods

A CITYWIDE SYSTEM OF CARE

The new St. Luke's will be a full-service hospital providing more of the health care services that the community needs, including 50% more emergency department space and a new urgent care program. The St. Luke's Campus will complement the services at CPMC's other medical campuses and support a network of outpatient facilities and physician practices. CPMC will continue to operate its inpatient psychiatric program as well as 100 skilled nursing facility (SNF) beds for our patients who need additional care after a hospital stay. This citywide system of care promises to provide the care our patients need for generations to come.
