

Alamo Square
Neighborhood Association

August 23, 2010

Dear Planning Commission and Board of Supervisors,

The Alamo Square Neighborhood Association supports the seismic rebuild projects for California Pacific Medical Center, which includes a rebuilt St. Luke's hospital at Valencia Street and Cesar Chavez Street, and a new hospital at Van Ness Avenue and Geary Boulevard.

The new hospitals will allow CPMC to continue to provide acute care services. These projects will provide modern, seismically safe facilities for San Francisco.

We urge you to approve the projects so that San Francisco can be prepared in the event of a major earthquake. San Francisco needs seismically safe hospitals.

Sincerely,

Ben Allison, President
Alamo Square Neighborhood Association
